### ③ Read the following text, then answer the questions (6 M)

The caracal is a beautiful gold - coloured wild cat with large ears. Caracals are not very big. They have large ears which help them to hear very well. They also have a lot of fur on their feet. Caracals can jump vey high and are able to climb trees. Caracals are found in many places in Africa and the Middle East. They live in deserts, grasslands and forests. As for food, caracals catch and eat many animals, including mongooses, birds and rabbits. They are usually active at night and most of them live alone. Mother caracals often live in holes that are made by other animals. Caracals usually have between three and six babies called kittens. The kittens stay with their mother for about ten months. Caracals can live up to 12 years in the wild.
